

## Summer Newsletter

This morning I was reading the Utah Business Magazine. It was the Entrepreneur of the Year Award edition. As I was reading through the winners, the common theme among all the winners contributed their success to a healthy work culture. Below are statements from the award winners:

“Every company effort is founded on principles of integrity, quality, commitment and teamwork.”

“Our success is due to a big vision, a ton of hard work, an amazing team and a bit of luck.”

“It has not always been easy, but when people love their jobs, appreciate those they work with and are working toward a common goal, it makes your job a pleasure and not so much a job.”

As we look toward the future for Park City School District, I believe in a simple, straightforward goal - All Students Learning!

Update on Professional Learning Community We held a two day PLC training in June with a team of teachers, academic coaches, technology coaches, assistant principals, principals, district staff members, and board member. It was two days of intense learning and discussions as we planned to increase student learning in every classroom every day. We have the continuance of the training planned for two days in August with the same team as we continue with the three-year training plan.

Update on the Data System to Support PLC On Wednesday, July 30th, a team of teachers met with Dr. Einhorn to review the assessment questions that will be delivered to our students during the first benchmark.

Update on MindSet I have received the survey results for the information produced from MindSet Data Collection. We will be reviewing the information in various formats beginning with district C-Suite (Cabinet members), principals, and governing board. We will then begin working with department/ team of teachers to share the data to intentionally improve the working culture of PCSD. On a side note, I am completely

impressed with the quality and detail of the data. It is extremely eye opening and encouraging as we work together for our students.
