Dear Parent/Guardian:

Please be aware of the following information and appropriate documentation required for a student to receive a modification of the current school meals being served in the Park City School District's Child Nutrition Program. Until the enclosed forms are completed and returned, the Child Nutrition Department cannot consider special accommodations.

Physician's Statement for Children with Disabilities

USDA regulations 7 CFR Part 15b require substitutions or modifications in school meals for children whose disabilities restrict their diets. A child with a disability must be provided substitutions in foods when that need is supported by a statement signed by a licensed physician. The physician's statement must identify:

- ✓ the child's disability;
- ✓ an explanation of why the disability restricts the child's diet;
- ✓ the major life activity affected by the disability;
- ✓ the food or foods to be omitted from the child's diet, and the food or choice of foods that must be substituted.

In Cases of Food Allergy

Generally, children with food allergies or intolerances do not have a disability as defined under either Section 504 of the Rehabilitation Act or Part B of IDEA, and the school food service is not required to make food substitutions for them.

However, when in the licensed physician's assessment, food allergies may result in severe, life-threatening (anaphylactic) reactions, the child's condition would meet the definition of "disability," and the substitutions prescribed by the licensed physician must be made.

Medical Statement for Children with Special Dietary Needs

Each special dietary request must be supported by a statement, which explains the food substitution that is requested. It must be signed by a recognized medical authority.

The medical statement must include:

- ✓ an identification of the medical or other special dietary condition which restricts the child's diet;
- ✓ the food or foods to be omitted from the child's diet; and
- ✓ the food or choice of foods to be substituted.

If you have any questions, please call the Child Nutrition Department at 435-615-0204 or email childnutrition@pcschools.us.

Sincerely,

John Hopkins

John Hopkins, Director of Child Nutrition Services

Individuals with Disabilities Education Act

The term child with a "disability" under Part B of the *Individuals with Disabilities Education Act* (IDEA) means a child evaluated in accordance with IDEA as having one or more of the recognized thirteen disability categories and who, by reason thereof, needs special education and related services.

IDEA recognizes thirteen disability categories which establish a child's need for special education and related services. These disabilities include:

- autism;
- deaf-blindness;
- deafness or other hearing impairments;
- mental retardation;
- orthopedic impairments;
- other health impairments due to chronic or acute health problems, such as asthma, diabetes, nephritis, sickle cell anemia, a heart condition, epilepsy, rheumatic fever, hemophilia, leukemia, lead poisoning, tuberculosis;
- emotional disturbance;
- specific learning disabilities;
- speech or language impairment;
- traumatic brain injury; and
- visual impairment; including blindness which adversely affects a child's educational performance, and
- multiple disabilities.

Attention deficit disorder or attention deficit hyperactivity disorder may fall under one of the thirteen categories. Classification depends upon the particular characteristics associated with the disorder and how the condition manifests itself in the student, which will determine the category.

The Individualized Education Program or IEP means a written statement for a child with a disability that is developed, reviewed, and revised in accordance with the IDEA and its implementing regulations. The IEP is the cornerstone of the student's educational program that contains the program of special education and related services to be provided to a child with a disability covered under the IDEA.

NOTE: Some states supplement the IEP with a written statement specifically designed to address a student's nutritional needs. Other states employ a "Health Care Plan" to address the nutritional needs of their students. For ease of reference, the term "IEP" is used to reflect the IEP as well as any written statement designating the required nutrition services.

When nutrition services are required under a child's IEP, school officials need to make sure that school food service staff are involved early on in decisions regarding special meals.
